liners that live TRADE MARK and Grow

SHRUBS SHADE TREES
VINES EVERGREENS
BROADLEAF EVERGREENS FRUIT TREE STOCKS

Better stands. Pot plants have a better root system and stand the shock of transplanting better than bare root stock. You get better stands; it costs you less per plant care for them in the field; you have more finished stock to sell.

Better growth. Pot plants start off quicker and make a better first season growth; thus they are ready to market sooner.

You can plant later. Pot plants can safely be set out in the field much later than bare root stock. This gives you more planting time in your busy season. **With** irrigation you can plant nearly all summer.

Container Growing. Pot plants give better results in containers than bare root liners. You get a bigger growth in less time, hence are ready to market sooner.

Minimum Quantities. Please do not order less than 25 of any one plant. 300 of any one variety supplied at 1,000 rate.
